## Introducing Drive Poker table

Drive Poker is an electronic poker table for 10 players combining excitement of live poker with technical achievements of poker online. Though the players sit at the same table, all game actions are automatically performed by the electronics of the table. The table can operate non-stop for 365 days a year and moderately skilled personnel can manage its operation.

The poker boom, spreading over the world in recent years, starts reaching central Europe, too. Do you want to ride on the increasing surge of interest in poker?

But willing not to add new troubles with organizing live game? Then the new electronic poker table Drive Poker is your true choice!

### Main advantages of the electronic table

It will attract new players

Game for as much as 10 players on one table

Your instructed personnel can manage the operation

The game can run non-stop for 365 days a year

Cards and chips are virtual - they don't wear out

Drive Poker electronic poker table can be used for both cash games and sit&go in the most popular poker variant of Texas Hold'em (Limit, Pot Limit and No Limit).

The value of bet limit or start fee can be set according to wish of guests.

### Made in Czech republic

The Drive Poker electronic poker tables are based on purely Czech know-how, the tables are assembled in the Czech Republic. In comparison with similar competition products the big advantage is an easy and quick availability of service technicians and spare parts.

### 24 hours a day, 365 days a year, no worries

Imagine a dealer making never mistake, working for free and never cheats you. Exactly these are the features of Drive Poker electronic poker table that manages all game situations automatically without any need of operator intervention. Moreover, every dealer gets tired after a time and needs to be relieved. The Drive Poker electronic poker table can operate non-stop.

## Why to select just Drive Poker?

While the Drive Poker electronic poker table offers your guests an exciting poker action, for you it saves money, time and energy. You will no more need to hustle and organize dealers, buy new cards and chips or replace table coverings. You just plug the Drive Poker in and look forward to satisfied players.

### User friendly

Each player controls the game using a 15" (38 cm) touch screen. The screen shows game information of all kinds as well as offers of preset play options.

Controlling the game with touch screens is easy enough even for players having little or no experience in poker.

### Resistant to emotion bursts

The desk of the Drive Poker electronic poker table is covered with a ply of a very hard and resistant African wood bubingo. In addition, the ply is surface treated with several coats of hardened lacquer protecting it from cuts and scratches. The touch screens are protected against mechanical damage by hardened glass sheet.

### Perfect information on game

In the middle of the table there is located a colour LCD monitor of 40" diagonal (101 cm) displaying not only exposed community cards but also current bank value as well as bets of individual players. This substantially contributes to better orientation in game, especially for beginners.

### Support of fidelity chip cards

The player module contains also a chip card reader. The Drive Poker electronic poker table provides an easy coding of fidelity cards of regular customers for the purpose of collecting points into your fidelity program.
